Good Day I have put together a few solar systems for a few lights and charging cellphones. However I need to put a system together to run a fridge and a few lights for a few hours. No idea where to start. What solar panels to get, inverter needed, solar controller etc. Any advice appreciated.

A 110V fridge and TV requires at least 500 watt solar panels and 200ah batteries. But a 120 watt solar panel can run a 12V refrigerator and a 50 inch LED TV for 2 to 3 hours. How To Calculate Solar Panel Needs: TVs have no problem with solar panels. Even a 50 inch TV is only 100 watts, and most RV TVs are smaller than that.

For lighting, LED bulbs are recommended for their energy efficiency. The article also mentions the importance of having a solar generator for off-grid scenarios or during power outages, which can store excess solar energy for later use. It concludes by advising on the size of the solar panel system needed to power these devices efficiently.
