

# Cabo Verde bluepalm powerstation

Does Cape Verde have solar power?

In 2012 Cape Verde had an installed electricity generation capacity of around 300 MW, of which about 24% from wind power plants and 3% from photovoltaic stations. While solar power has an enormous potential as a source of renewable energy, natural conditions in Cape Verde are one of the best in the world for the production on wind energy.

How do I charge my bluepalm power station?

Flexibility when charging your Bluepalm power station. The Power Station has three charging options: mains power, car adapter and solar. The built-in controller supports solar inputs of up to 1,000 W (solar panel idle voltage range 12 V-60 V).

How much energy does Cape Verde produce?

Cape Verde is a net importer of energy, with no significant fossil energy resources. As of 2016, 176,743 tonnes of fuel (about 3,550 barrels per day) were sold on the internal market. Electricity production was 443 GWh in 2016, of which 81% from thermal power, 17% from wind power and 1.4% from solar power.

How much does the Palmarejo thermal plant cost?

Prime minister José Maria Neves has inaugurated an expansion of the Palmarejo thermal plant on Santiago island. Two new 11.3 MW gas generators have been installed at the plant, bringing total capacity to 71 MW at a cost of EUR 20m (\$22m). Neves said the extension meant power demand was now 96% met.

Is Cape Verde a viable alternative to fossil fuels?

Solid waste can also represent an adequate option while ocean and geothermic energy are being tested, with uncertainties remaining as to their efficiency. Cape Verde has an estimated potential of 2,600 MW of renew-able energy, and more than 650 MW have been studied in concrete projects, which have lower production costs than fossil fuels.

Who produces electricity in Cape Verde?

Electra serves all islands of Cape Verde except Boa Vista, where electricity and water are produced and distributed by the public-private company ENEC Energia de Boavista. Other smaller electricity producers are CEBELSA, which operates four wind parks, ENEC de Ponta Preta on the island of Sal, and Electric Wind on Santo Antão.
