

Does Cabo Verde use biomass?

Traditionally, the population of Cabo Verde use biomass as a primary renewable energy resource, which still covers a significant proportion of household energy needs (for cooking), especially in rural areas (55 percent).

How can Cape Verde meet its goal of 50% renewables?

Cape Verde can meet its goal of 50% renewables today by integrating energy storage. A 100% Renewable System is achieved from 2026, with a 20 year cost from 68 to 107 MEUR. Current paradigm doubles emissions in 20 years and costs ranges from 71 to 107 MEUR. The optimal configuration achieves 90% renewable shares with a cost from 50 to 75 MEUR.

Does Cape Verde have a wave energy potential?

In the case of Cape Verde, there is one study evaluating the wave energy potential which highlights the resource available, particularly for the northern islands, such as S#227;o Vicente . Unfortunately, the study identifies the wave resource to match that of the wind.

Is Cape Verde a developing state?

The archipelago of Cape Verde is a developing state in West Africa with extreme external energy dependency on refined oil imports despite their available solar and wind resources. Aligned with the global energy transition, the local government established goals in 2011 aiming at 50 and 100% RES.

How much does electricity cost in Cabo Verde?

Electricity prices in Cabo Verde are amongst the highest in Sub-Saharan Africa. Indeed, residential tariffs have averaged US\$0.28/kWh over the past four years but have fluctuated as high as US\$0.36/kWh in March 2019 for higher-consuming (>60 kWh/month) residential users.

Why is Cabo Verde growing so fast?

Following the global financial crisis of 2008, annual growth accelerated in Cabo Verde, particularly between 2016 and 2019, reaching 4.7 percent on average during that period, on the back of a thriving tourism sector and strong structural reforms. These included SOEs reform, fiscal restraint, and debt reduction.

Renewable Energy Cabo Verde makes an unconditional commitment: to achieve 100% grid access by 2017 ; and to achieve a 30% renewable energy penetration rate into the electric grid by 2025 . With international support, Cabo Verde seeks to increase the renewable energy uptake in electricity to 100% by ...
