

How can Cape Verde meet its goal of 50% renewables?

Cape Verde can meet its goal of 50% renewables today by integrating energy storage. A 100% Renewable System is achieved from 2026, with a 20 year cost from 68 to 107 MEUR. Current paradigm doubles emissions in 20 years and costs ranges from 71 to 107 MEUR. The optimal configuration achieves 90% renewable shares with a cost from 50 to 75 MEUR.

Why did Cabo Verde use CCDA-IX?

Cabo Verde used the CCDA-IX platform to underscore its green and blue recovery pathways as part of the management of the unique climate change risks that the country experiences as a small island developing state. Cabo Verde is making progress towards generating 30 per cent of its electric energy supply from renewable sources by 2025.

Does Cabo Verde have a climate resilient future?

In its quest for a climate resilient future, Cabo Verde has already mainstreamed climate change adaptation and mitigation in its development plans covering national and municipal levels of governance.

Is Cape Verde a developing state?

The archipelago of Cape Verde is a developing state in West Africa with extreme external energy dependency on refined oil imports despite their available solar and wind resources. Aligned with the global energy transition, the local government established goals in 2011 aiming at 50 and 100% RES.

Does Cape Verde have a wave energy potential?

In the case of Cape Verde, there is one study evaluating the wave energy potential which highlights the resource available, particularly for the northern islands, such as S. Vicente. Unfortunately, the study identifies the wave resource to match that of the wind.

Advisory Services to Elaborate the Cape Verde Smart Grid Roadmap. Cabo Verde has set ambitious targets for renewables alongside improving security and quality of service. There is a consensus that adopting Smart Grid solutions is the key towards energy transition in the country.

The financing falls under Cabo Verde's national electricity master plan 2018-2040, which aims to reduce the country's dependence on expensive and polluting fossil fuels by 2040. It will also provide new storage capacity for electricity from renewable sources.

Praia, December 5, 2023 - The ECOWAS Centre for Renewable Energy and Energy Efficiency (ECREEE) and the Foundation Smart City Cabo Verde have signed a memorandum of understanding aimed at spurring innovation in the field of ...
