

Is biomass a source of energy in Sri Lanka?

Biomass is primarily used to satisfy domestic energy needs in local households with 69 % of Sri Lankans using it to fulfill their cooking energy requirements (Musafer,2020). Despite the continued usage of biomass in the country,limited attention has been given to developing it as a formal source of energy.

Does Sri Lanka use wind power?

Sri Lanka's history of using wind power dates back to the 3rd century B.C.and as showcased in Fig. 2 the country currently boasts over 5000 km² of windy areas that are considered to have excellent wind resource potential areas (Sri Lanka Sustainable Energy Authority Ministry of Power and Energy,2019).

How much energy does Sri Lanka generate?

Until the late 90 s,hydropower acted as the country's key energy generator producing nearly the entirety of Sri Lanka's energy requirement. Over the past decade,hydroelectricity has continued to generate between 3.5 to 7 TWhof energy whilst remaining one of the top three energy-generating sources in the country.

Is Sri Lanka a viable alternative energy source?

Moreover,Sri Lanka has also identified the potential for wind,bioenergy,and solar as alternative energy sources in the past two decades. However,the current contribution from these three renewable sources in comparison to hydroelectricity remains significantly low.

Does Sri Lanka have solar energy?

Furthermore,Sri Lanka' has also seen an increase in the energy generated through bioenergy sources (geothermal,biomass and waste energy) with this segment producing approximately 250 GWh of energy by 2020. However,despite its potential,solar energy has had an uninspiring growth until 2016.

What percentage of Sri Lanka's energy source is renewable?

However,as of 2018,only 39 %of Sri Lanka's energy generation capacity was harnessed through renewable energy sources. The continuous increase in electrical energy demand and the drastic increase in vehicle population over the past few years have resulted in much of its annual income being spent on purchasing fossil fuels from foreign countries.
