

Camera photovoltaic panel accessories manufacturer

What is a photovoltaic panel used for?

80 W photovoltaic panel, 30 Ah chargeable lithium battery (The battery should be ordered separately.) It can be used in the areas that are not suitable for laying wired network and electric supply lines, or used for the scenes that feature tough environment and have high demanding for device stability.

Is Hikvision a solar-powered product?

Hikvision's solar-powered product family continues to grow, adding multiple functions and formats - even kits you can design yourself for your unique application. The new-generation solar-powered products provide flexible viewing angles, simple deployment, and reliable performance for virtually limitless scenarios.

Can solar-powered security cameras be used in remote locations?

Deploy reliable solar-powered security cameras for rugged video security in remote locations beyond the reach of power supplies and Ethernet cables.

Does an outdoor IP security camera need a solar panel?

The practical limitations of an outdoor IP security camera are largely overcome with the inclusion of a solar panel. A solar panel allows for the security camera to be constantly charged with energy the panel harnesses from the sun. This means your security camera doesn't need to be plugged in, hardwired, recharged, or consume disposable batteries.

Why should you use Hikvision's solar-powered camera in a forest?

Forests tend to have lots of trees and waters, making it difficult to deploy wired devices. Hikvision's solar-powered camera setup leaves a small footprint on the environment while facilitating animal protection and fire detection from remote, aside from meeting other security demands.
