

Can shopping malls make money by doing solar power generation

Do malls need solar panels?

Solar panels for malls are a practical solution and guaranteed to produce free electricity for 25-30 years. Solar power can provide electricity even when the grid has an outage. Electricity can be stored in batteries until it is needed during an emergency or when the sun goes down. Solar power provides an efficient source of power.

Can solar power power a shopping mall?

Using solar power to power a shopping mall is a great idea. Malls, with their large expanses of flat roof space, are a logical place to install solar panels. Any business related to trade, in one way or another, consumes electrical energy. Accordingly, the use of solar power plants is economically justified and expedient.

Are shopping malls the future of energy management?

Shopping malls and similar venues present attractive, big-time opportunities as potential sites for grid-connected solar power, energy storage and intelligent, highly energy-efficient facilities management.

Why should you install solar panels on shopping mall rooftops?

Installing solar panels on shopping mall rooftops provides great publicity for reducing pollution. Protect your shopping mall against future electric rate hikes and attract more customers with your green reputation. Our company builds solar power plants for shops and shopping centers, performing all the necessary functions of a general contractor.

How do photovoltaic and wind generators work in a shopping mall?

Both photovoltaic and wind generators directly produce electricity, and they are applied mainly to meet local needs. However, a shopping mall is also characterized by a significant heating and cooling demand that could be fulfilled through renewable energy resources.

Should trade businesses use solar power plants?

Any business related to trade, in one way or another, consumes electrical energy. Accordingly, the use of solar power plants is economically justified and expedient. The use of solar electricity for own needs is effective both for small retail outlets and for large trade enterprises (shops, markets, shopping centers).
