

California is enhancing its transmission system to facilitate the transition to a reliable, clean, and affordable energy system. The updated system will deliver electricity over long distances, connecting communities across the state to abundant renewable resources located throughout California and the West.

antennas are major contributors to CEC system acquisition and life-cycle costs. As Technical Direction Agent for CEC, APL, working in conjunction with the Navy's Design Agent, Raytheon Company, has played a leading role in developing array antenna systems for CEC. Figure 1 summarizes CEC array development, including the
