Cellcube corning Turkmenistan

What is the Corning cellcube system?
The Corning CellCube system provides a compact,perfusion-based method for the mass culture of attachment-dependent cells. CellCube modules consist of a series of 10,25,or 100 parallel,polystyrene plates joined to create thin,sealed laminar flow spaces between adjacent plates.

What are cellcube modules?
CellCube modules consist of a series of 10,25,or 100 parallel,polystyrene platesjoined to create thin,sealed laminar flow spaces between adjacent plates. CellCube modules are available with either a Tissue Culture (TC)-treated growth surface or Corning CellBIND® surface for cell attachment.

What surface treatments are available for cellcube modules?
CellCube modules are available with either a Tissue Culture (TC)-treated growth surface or Corning CellBIND® surfacefor cell attachment. The surface treatment is applied to both sides of each layer to achieve available surface area ranging from 8,500 cm2 to 85,000 cm2 in a compact footprint.

How does the cellcube system work?
Utilizing a perfusion-based design,the CellCube system is able to mimic the constant fluid flow of in vivo conditions and reliably distribute nutrients and oxygen with low differential gradients across all attached cells throughout the modules.

The CellCube Module is an integral, encapsulated, sterile, single-use device that is 100% pressure-hold tested before shipment. It is comprised of a series of parallel, styrene plates ...

The CellCube Module is an integral, encapsulated, sterile, single-use device that is 100% pressure-hold tested before shipment. It is comprised of a series of parallel, styrene plates joined to create thin, sealed, laminar flow spaces between adjacent plates. Each culture plate receives proprietary tissue culture treatment prior to assembly to ensure dense, uniform cell growth.

The Corning CellCube system provides a fast, simple, and compact method for the mass culture of attachment-dependent cells. It uses a tissue culture-treated growth surface for cell attachment, and continually perfuses the cells with fresh medium for increased cell productivity. The CellCube system provides an environment which more closely simulates in vivo conditions and reliably ...
