

Cellcube preis El Salvador

Who is cellcube?

CellCube intends to be a fully integrated producer of vanadium, vanadium electrolytes and vanadium redox flow batteries for the Energy Storage Market. We put 15 years of research and development into the CellCube to provide you with a top-notch energy storage system.

What is a cellcube used for?

With its simple and independent scalability in power output and storage capacity, the CellCube is already over 130 units in operation for individual industrial applications, to even out load peaks, for e-mobility solutions, for off-grid applications and for microgrid power supply in regions without a stable power grid.

Who is cellcube energy storage system?

Correct, CellCube Energy Storage System Inc. is a vertically integrated energy storage system provider. We are in the process of setting up the vanadium mine to produce all-vanadium electrolyte for the use in CELLCUBE flow batteries, exclusively.

Why should you choose a cellcube?

Based on the vanadium redox flow technology, the CellCube allows for a clean, emission-free and fast energy supply at all times. A stable power supply, in combination with renewable energy sources, is ensured at all times and in every climate zone. The use of vanadium electrolytes increases the safety and battery life.

When did cellcube start selling ESS systems?

We started selling our CELLCUBE branded ESS systems in 2008 and while the first years (until around 2010/11) the main customer focus was on technology proof and application specific demo/pilot projects we have around 30% of the installed base in early adopter but commercial use.

How long does cellcube cycling last?

Plus, the performance of the CellCube is still put under the microscope every single day in our own research facility. For more than 5 years now, the product has been running a continuous test with undisturbed operation meanwhile reaching over 10,000 cycles, which is equivalent to 28 years of daily cycling.

With its simple and independent scalability in power output and storage capacity, the CellCube is already over 130 units in operation for individual industrial applications, to even out load peaks, for e-mobility solutions, for off-grid ...

Vanadium redox flow battery (VRFB) developer Enerox, better known by its CellCube brand, has set up a subsidiary in Colorado, US, to bring its product to the North American market. It established CellCube Inc. in Denver ...
