Are Chinese battery makers finding a way out?

Lyu Xiang, a US studies expert at the Chinese Academy of Social Sciences, said that Chinese battery makers are also finding ways out, as can be seen in the Ford-CATL cooperation, where CATL will license its technology to Ford instead of directly producing batteries.

Will Chinese battery manufacturers go global in 2024?

Looking ahead to 2024, however, many experts worry about rising geopolitical uncertainties abroad while Chinese battery manufacturers go global. CATL's factories in the US and Hungary, for instance, were reported to have been halted under investigation by local authorities.

Does China have a competitive advantage in lithium-ion battery production?

Moody's analysts also said that China's competitive advantage in lithium-ion battery cell production gives its carmakers an edge in terms of EV production costs. "China is expected to account for more than half of the global supply of lithium, with that advantage (in addition to) lower labor costs," they said.

Will China's battery regulations increase the cost and prolong the R&D process?

Zhang Xiang, an auto sector researcher at the North China University of Technology, said: "Such regulations will undoubtedly increase the costs and prolong the R&D process to meet the requirements for Chinese battery manufacturers over the short term."
