Why do power Lite batteries need a Uz BMS?

These cells have much less tendency to drift apart in voltage, capacity, and internal resistance over time. In addition, the UZ BMS allows connecting multiple Power Lite batteries in parallel, without ensuring they all have the same voltage beforehand.

Do Uz batteries need balancing?

Of course, this is also true of UZ batteries, though it is unnecessary to do as much balancing as many other batteries because of the high-quality cells used. These cells have much less tendency to drift apart in voltage, capacity, and internal resistance over time.
