

Is hydrogen a solution to the Gambia's energy deficit?

One month later, the government signed another MoU with H2 Gambia Limited, a subsidiary of the UK-based HydroGenesis Group, at African Energy Week 2023 in Cape Town to further explore the commercial prospects for hydrogen production. Renewable energy and green hydrogen present a dual solution to The Gambia's energy deficit.

How much energy does the Gambia use?

In 2010, Total energy Supply (TeS) in The Gambia was 407 926 TOe. The energy consumption per capita in The Gambia in 2007 was 81 kilogrammes of oil equivalent (KGOe) according to figures from the Global Environment Facility (GeF) and the United Nations Industrial Development Organisation (UNIDO) in 2011. Biomass, Kuntaur Wharf on the River Gambia.

Why is limiting energy losses important in the Gambia?

Limiting energy losses along the power system chain, i.e., from generation to end-use, is critical. This should form part of The Gambia's future energy strategy. High transmission and distribution losses (over 30% in The Gambia) worsen the energy security problem. They also deepen suppressed demand.

Energy Situation. Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Gambia on the IndexMundi Homepage. Find relevant information for Gambia on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage ...
