

Cold electric Brunei

Who is cold electric?

We are Cold Electric, a smart battery company. We reduce energy waste to almost zero, creating dynamic opportunities in a clean-energy future. Our batteries create decentralised, self-sufficient living. The days when millions of people's electricity needs were met by a handful of large coal, nuclear and gas-fired power stations are waning.

Why do cities use cold electric batteries?

Transportation of energy from power plants to buildings creates 7.2% of this waste. Cold Electric batteries allow users to store the wasted energy from the peak & off-peak fluctuations, so cities don't waste energy on transportation and don't need to spend money on expensive power plants. Which battery is right for you?

What does Cold Electric do?

Cold Electric is committed to collaborating with customers and partners to drive innovation and development in energy technology. We look forward to working together with various stakeholders to achieve the goal of sustainable energy and contribute to creating a better living environment for the future.

What will cold electric batteries do?

Cold Electric batteries will supercharge renewable energy adoption. Localised energy production (solar & wind) and storage (batteries) will save people, cities and businesses money. Using our smart batteries, energy independent consumers will begin to decentralise the energy market.

Are cold electric batteries safe?

Our batteries run at a temperature that is 15% lower than that of competitors, minimizing fire hazards and explosion risks. The fire risk for a typical LFP battery is 150°C, for Cold Electric batteries it's between 280-320°C due to charging and discharging at cooler temperatures. We're the safest and most stable battery on the market.
