

Cold electric Norfolk Island

Who is cold electric?

We are Cold Electric, a smart battery company. We reduce energy waste to almost zero, creating dynamic opportunities in a clean-energy future. Our batteries create decentralised, self-sufficient living. The days when millions of people's electricity needs were met by a handful of large coal, nuclear and gas-fired power stations are waning.

What are Norfolk Island electricity services?

Norfolk Island electricity services are comprised of two main elements, the: Reticulation. Administrative, clerical and billing components are carried out by the Finance branch and are supported by other areas such as the Legal Services Unit and Customer Care.

Why is Norfolk Island transitioning to green energy?

Norfolk Island is transitioning to green energy to reduce its dependence on diesel-fired generation, which is becoming more expensive and more difficult to source as countries around the world seek to decarbonize their economies. This initiative is comprised of several interrelated elements: Project Background

What does Cold Electric do?
