

Colombia solar energy partners

How many solar and wind projects will Colombia have by 2023?

The two auctions resulted in a total of 2.5 gigawatts of new solar and wind projects to be in operation by 2023, which will allow the government of Colombia to surpass its initial goal. The government of Colombia then announced it would increase its goal of increasing the share of solar and wind integration to 20% by 2030.

Will Colombia increase solar and wind integration by 2030?

The government of Colombia then announced it would increase its goal of increasing the share of solar and wind integration to 20% by 2030. As such, the government of Colombia is considering and developing supportive policies, regulations, programs, and initiatives to successfully meet their renewable energy targets.

How can Colombia support its energy transition priorities?

To support Colombia's energy transition priorities, the development team created a series of training modules designed to ready Colombia's energy sector workforce to participate in the construction, operation, and grid integration of VRE projects.

Why should Colombia diversify its energy mix?

Diversifying its energy mix to include more solar and wind renewable energy is a priority for Colombia, which is undergoing rapid transformation in its electricity sector as a result of changing economic, political, technological, and environmental conditions.

Los precios de energí;a en Colombia continúan su tendencia al alza, mientras la energí;a solar cada vez es más competitiva. El desarrollo de grandes y pequeños proyectos a partir de esta tecnología, se pueden ver beneficiados de montos más bajos de inversión y ...
