

Comap microgrid controller North Korea

Does COMAP have a programable logic controller?

Built-in PLC ComAp has integrated Programmable Logic Controller tightly with our standard line of controllers. This helps our customers to cut costs, minimise points of failure for advanced systems, and overcome any challenge that may occur.

Which controllers are compatible with COMAP's intelidrive tool?

The tool is compatible with ComAp's IntelliDrive DCU Marine/Industrial, IntelliDrive Mobile, IntelliBifuel and IntelliBifuel Mobile/Lite controllers. Didn't find what you were looking for?

How do I connect my COMAP devices?

Almost all ComAp devices support connection using simple USB A<->B cable (printer cable) for easy configuration. Some devices can be powered from the USB port for programming to allow easy configuration right on your desk. Other connection types: Internet connection (LAN, GPRS, 3G, 4G), Modbus RTU, Modbus TCP, SNMP, AirGate, Modem.

North America (English) ... The IntelliNeo 5500 is a microgrid controller that offers a cost-effective solution for combining traditional grid or gen-sets with renewable energy sources to create a reliable and efficient power generation system. ...

North America (English) ... The IntelliNeo 5500 is a microgrid controller that offers a cost-effective solution for combining traditional grid or gen-sets with renewable energy sources to create a reliable and efficient power generation system. ... The solution is a combination of the IntelliGen 500 gen-set controller, a custom microgrid ComAp ...

ComAp's product family for microgrid control and energy management. Home Applications Applications Power Generation. Hybrid Mission Critical Combined Heat and Power (CHP) Bi-fuel & Hydrogen Fuel Cells Rental, Telecom and ...

In the meantime, when the pandemic went under control, it evolved into a vaccination center and a microgrid test center with an EV charging infrastructure upgrade, also relying on ComAp controls. Due to the Singapore government's ongoing commitment to environmental sustainability, they decided to have this site powered by a 100% renewable ...

North America (English) United Kingdom (English) ... Single control ecosystem. IntelliNeo is a microgrid controller that directly manages renewable and storage sources and coordinates with mains and gen-set controllers to create one integrated power system. ... ComAp Control Iberia. 1 Jul 2024 | 1 min News ...

The solution is a combination of the IntelliGen 500 gen-set controller, a custom microgrid ComAp firmware

upgrade activated by a software key and an IntelliFieldbus Gateway for interaction with third-party products, including solar inverters.

North America. Australia (English) France (French) ... IntelliGen 1000 is the most advanced ComAp gen-set controller for multiple gen-sets with paralleling operations, with or without connection to the mains or other source. ... The IntelliNeo 5500 is a microgrid controller that offers a cost-effective solution for combining traditional grid or ...

Hybrid Microgrid Solutions for Integrating Diverse Energy Sources. Since its establishment in 2011, ComAp S.E. Asia has specialised in hybrid microgrid control, utilising the latest technological advancements to develop adaptable solutions that integrate diverse energy sources, including solar, wind, diesel, and battery storage systems.

InteliSys NTC Hybrid is a controller for hybrid microgrid applications, supporting the combination of renewable energy sources with gen-sets. The controller can be used for both on-grid and off-grid applications to help optimise the use of renewable energy and reduce your carbon footprint.

ComAp has launched IntelliGen 500 Microgrid, ... North America (English) United Kingdom (English) Insights ... ComAp Control Iberia. 1 Jul 2024 | 1 min News IntelliLite Controllers Now Support Hybrid Control for Single Gen-set Systems. 27 Jun 2024 | 1 min News ...

Portable simulator of hybrid microgrid sites with ComAp's IntelliNeo 6000, a controller for managing and optimising on-grid and off-grid hybrid microgrid systems. The user interface is the IntelliVision 10 Touch display, that has integrated SCADA and a ...
