

Why are commeo batteries important?

Commeo batteries are essential. Together, we enable self-sufficient energy supply for industrial and commercial companies. Managing Director ElectroFleet GmbH Robert Härtel With Commeo, we found a competent partner for our decentralized microgrid solutions: powerful battery storage systems.

Is commeo a good replacement for old battery storage?

Press Officer Stadtwerke Witten Julian Klug Our partner Gustav Klein recommended the Commeo system as a replacement for our old battery storage. The biggest advantage is the additional functions and larger capacity, allowing more energy storage. We are satisfied with Commeo's service, quick issue resolution, and high-quality product.

What does commeo do?

Commeo has made it its mission to provide companies with transparent and self-determined control and continuous optimisation of their energy infrastructure as an integrated solution provider.

Commeo receives prestigious EES award Commeo GmbH, the specialist for industrial battery storage systems, has now been awarded the prestigious EES award 2021. At the Smarter E ...

Self-consumption optimisation with battery storage systems from Commeo Sooner or later, all companies that produce solar energy have to deal with the issue of self-consumption. This applies equally to industrial or commercial enterprises, regardless of whether they are in the energy-intensive metal industry or a bakery. Food retailers, which ...

Commeo battery systems already today ensure the uninterrupted power supply of industrial parks or protect electric systems from damage caused by grid fluctuations. They provide power compensation for renewable energy systems and serve as a buffer: If the voltage is too high, they charge current and cushion peak loads.

AFK is happy to announce the acquisition of a majority share of Commeo on April 6th, 2022. "After having screened several battery related companies in Germany and neighboring countries, and after several discussions and meetings with the Commeo team, we have agreed with the shareholders of Commeo to acquire a 54.9 % stake of the company.

Israeli startup Addionics is a chemistry-agnostic battery technology company that manufactures 3D Current Collectors, which drive significant battery manufacturing and performance benefits. The ...

Lithium Ion Battery. Li-Ion (Lithium-Ion) is the most common cell for mobile applications - Ranging from mobile phones to usage of space applications. These cells are very easy to come-by, the problem is assembling them correctly, with ...

We provide the best solution for most brands and models of e-bikes found in use today in Israel. Our long-term experience and intensive research has allowed us to provide the user with top quality cells and battery cases, with custom-made BMS controllers and best quality Silver Fish cases, with bonus features built-in.

Commeo has succeeded in giving systems like those using XALT Energy battery cells double the performance of its competitors' solutions, which corresponds to a C-rate greater than 2 - and that is true until the battery is drained, not just ...

With a load capacity of 1,500 N, the frames are very stable. A total of 45 battery blocks, each with 1.5 kWh, are compactly housed in a rack inside the battery storage enclosure less than 70 cm wide. The remaining space is available for the Commeo control technology, climate control, and other built-in components.

Mit Commeo als zentralem Baustein wird Ampwell die Hardware von Commeo mit der Kompetenz und Technologie der AFK-Portfoliounternehmen Volue und EFD Induction sowie Collect Energy kombinieren, um ein Ökosystem für Batterietechnologie und ein Battery-as-a-Service-Geschäftsmodell aufzubauen.

Energy storage from Commeo From blocks to cabinets to containers - Commeo provides you with unprecedented flexibility to build a sustainable and economical energy supply. ... We develop and produce our battery systems and energy storage solutions in-house, allowing us to respond to your requirements in a self-determined and flexible manner ...

Addionics" drop-in solution can be seamlessly integrated into any battery assembly line.Our advanced 3D Current Collectors are coated by the market's traditional processes. This makes the technology chemistry agnostic to enable the next generation of batteries for any kind of battery chemistry, existing and emerging.
