Who is Congo energy?

Exclusive distributor of PRAMAC products in the DRC, Congo Energy offers a wide range of reliable and efficient generator sets. Our energy solutions cover various sectors, from light industry to specific infrastructures such as health and data centers. Thanks to our expertise, we offer tailor-made solutions and efficient after-sales service.

What certificate does Congo energy have?

Congo Energy has the certificate issued by ARSP (Autorit  de R gulation de la sous-traitance dans le secteur priv ). This certificate certifies that Congo Energy is authorized to work as a subcontractor in the Democratic Republic of Congo. Congo Energy strives to provide its partners and customers with high-quality products and services.

Where is the Republic of Congo (ROC) located?

The Republic of Congo (RoC), also known as Congo-Brazzaville, is a country located in central Africa and is bordered by countries as Gabon, Cameroon, the DRC, and Angola; RoC has an economy that is heavily dependent on oil which contributed to 60% of government revenue in 2016.

What is the energy potential of the DRC?

The DRC has immense and varied energy potential, consisting of non-renewable resources, including oil, natural gas, and uranium, as well as renewable energy sources, including hydroelectric, biomass, solar, and geothermal power.

What is the government's vision for power generation in Congo?

The government's vision is to increase the service level to 32 percent by 2030. Lack of access to modern electricity services impairs the health, education, and income-generating potential of millions of Congolese people. Most power generation development is directed and funded by mining companies seeking to power their facilities.

Who sells Pramac generators in the DRC?

Congo Energy is the exclusive distributor of PRAMAC products in the DRC, offering a wide range of generator sets, from 10 to 4,000 kVA, as well as after-sales service. As an official partner of Schneider Electric, Congo Energy is certified to distribute and install equipment.

The Republic of Congo (RoC) is making strides in renewable energy, with the planned construction of its largest hydroelectric dam at Sounda, slated to begin in January 2025. This \$9.4 billion project, financed and led by China Overseas, is poised to generate 600-800 MW, marking a crucial step in the country's energy transformation.
