

Could Mauritania's high-quality wind and solar resources be a catalyst for economic growth?

The sustainable development of Mauritania's high-quality wind and solar resources could serve as a catalyst for the country to achieve its vision of strong and inclusive economic growth, according to a new IEA report published today.

Can Mauritania generate low-cost electricity and hydrogen through electrolysis?

Renewable Energy Opportunities for Mauritania finds that the country could deploy these resources at scale to generate low-cost renewable electricity and hydrogen through electrolysis.

Could renewable generation capacity improve Mauritania's mining operations?

The report's analysis finds that expanding renewable generation capacity in Mauritania could improve the sustainability of mining operations, which currently represent close to a quarter of the country's GDP. These operations are energy-intensive, and mines currently rely predominantly on fossil fuels for their electricity supply.

Does Mauritania have a pipeline of renewable hydrogen projects?

Mauritania currently has the largest pipeline of renewable hydrogen projects to 2030 in sub-Saharan Africa. However, successfully implementing these projects is conditional on attracting sufficient investment, which in turn depends on reducing risk by securing demand from foreign offtakers.

Sheikh Zayed Solar Power Plant, a 15 MW facility in Nouakchott, is the first utility-scale one in Mauritania. It provides 10% of the country's grid capacity, producing 25,409 MWh of clean energy and reducing 21,225 tonnes of CO₂ emissions annually.

Cooper Energy Engineering is a professional engineering consultancy for the renewable energy sector. We undertake design work, feasibility and due diligence studies and project management in the UK and abroad. ... We specialise in solar photovoltaic (PV) and energy storage systems, but we can support our clients in a range of renewable energy ...

As Mauritania leads in west Africa's green energy transition, significant investment is being made in hydrogen, solar and wind energy developments. ... removing an estimated 57,000 tonnes of CO₂ per annum ...
