Costa Rica has a strong focus on renewable energy, with 99.78% of the energy output coming from renewable sources in 2020. However, solar power currently accounts for less than 1% of the country's energy production. In November 2021, Costa Rica approved a bill that allows individuals to produce their own renewable electricity and sell their surplus energy.

Energy Efficiency Constru Costa Rica places a premium on energy-efficient design. We recognize that the true success of your building project is revealed in your utility bills long after construction is complete. Client-Centric Approach At Constru Costa Rica, we prioritize proactive communication with our clients. ...

**LOWER ELECTRICITY PRICES:** Costa Rica has some of the highest energy prices in all of Latin America. This has negative effects on both the competitiveness of the country and the general cost of living. The table below lists the energy prices paid by industrial users consuming 50,000kWh per month as of Q2 of last year.
