

Costa Rica smartflower price europe

What is a smartflower Solar Flower?

The Smartflower solar flower is an all-in-one ground-mounted solar system with a tracker that follows the sun. However, it doesn't look like the solar panels you might be used to. Learn all about the product, how it compares to other solar options, and whether you should consider one for your home in our Smartflower solar review.

Is smartflower still available in Europe?

Since the Austrian company SmartFlower Energy went bankrupt, it is no longer purchasable in Europe. This said, an equivalent model simply named "SmartFlower" is still commercialised in the US. This model is very similar to the POP version, aside it being slightly more powerful (205 kWc) and available in fewer colours (white, grey, green and blue).

How much does a smartflower cost?

The base Smartflower itself is \$39,950 plus installation and shipping charges, and the Smartflower Plus is \$65,500 plus shipping and installation. Installation costs vary by difficulty and complexity of each setup, ranging from roughly \$3,000 to \$7,000, according to Gordon.

Where is smartflower Solar Flower installed?

However, it has been installed at a handful of U.S. houses and organizations like the Detroit Zoo and Mary Baldwin University. The U.S. division of Smartflower is currently based in Boston, Massachusetts. How is the Smartflower solar flower different from other solar options?

Does smartflower work in France?

Additionally, the SmartFlower can work in virtually any climate, as it can work at any between -20°C and 50°C. It will be usable anywhere in France, at any time of year. The first model introduced was SmartFlower POP.

Can a smartflower save money?

Historically, utility rates increase about 2.5% annually, so in the end, even a North Carolina homeowner who purchases a Smartflower could potentially save money in the long run. However, going solar with a Smartflower seems a little risky when there are more financially responsible options available.
