

Croatia eagle energy systems

How can Croatia improve energy security?

In order to strengthen energy security and reduce energy imports from third countries, Croatia is exploring the possibility to increase the production of domestic hydrocarbon resources. At the same time, Croatia also has plans to diversify natural gas supply routes by constructing an LNG terminal on the island of Krk.

Does Croatia have a national energy and Climate Plan?

To achieve its goal, Croatia set up a 2030 National Energy and Climate Plan. The national strategy aims at a 36.4% share for renewable energy by 2030 and significant investment across the energy sector, including hydropower, wind farms, solar photovoltaic plants, and hydrogen energy.

How much electricity does Croatia produce in 2022?

The total production of electricity in the Republic of Croatia in 2022 was 14,220.5 GWh, whereby 63.7 percent (9,064.9 GWh) was produced from renewable energy sources, including large hydropower plants.

How can Croatia achieve a low-carbon economy?

Croatia wants to cut its CO₂ emissions by 45% by 2030 and to abandon coal by 2033. But the transition to a low-carbon economy won't be easy, requiring major investments in new energy infrastructure and increased renewable energy resources. To achieve its goal, Croatia set up a 2030 National Energy and Climate Plan.

Can energy projects make Croatia greener?

Several energy projects aim to make Croatia greener, ensure a secure energy supply, and improve lives in Zagreb. Just eight kilometres from the Kastel Benkovic, a medieval castle, the village of Korlat produces one of the finest red wines in both Croatia and Europe.

What is Croatia's solar energy potential?

“Croatia's solar energy potential estimated at 6.8 GW”, Balkan Green Energy News. Retrieved 18 March 2022. ^Spasic, Vladimir (10 November 2021). “Croatia to add 1.5 GW of renewables by 2025”, Balkan Green Energy News. Retrieved 18 March 2022.
