

What is energy in Croatia?

Energy in Croatia describes energy and electricity production, consumption and import in Croatia. As of 2023, Croatia imported about 54.54% of the total energy consumed annually: 78.34% of its oil demand, 74.48% of its gas and 100% of its coal needs.

How can Croatia become energy-independent and sustainable?

In order to become energy-independent and sustainable, Croatia counts on its abundant renewable energy resources. In February 2020, the Croatian government adopted a new Energy Strategy for the period until 2030, with an outlook through 2050.

Is Croatia ready for the energy transition?

Croatia must revert to the integral use of renewable energy sources at its disposal, wisely manage its own resources and domestic production and decisively thread through the energy transition. It is, as a matter of fact, precisely Europe's vision: reliable, sustainable and accessible energy.

What is Croatia's energy strategy?

In February 2020, the Croatian government adopted a new Energy Strategy for the period until 2030, with an outlook through 2050. The Strategy includes a wide range of energy policy initiatives that will improve energy security, increase energy efficiency, lower dependence on fossil fuels, increase local production and increase renewable resources.

What percentage of Croatia's energy mix is renewable?

Renewable energies account for approximately 31.33% of Croatia's energy mix. Hrvatska elektroprivreda (HEP) is the national energy company charged with production, transmission and distribution of electricity.

What is Croatia's solar energy potential?

"Croatia's solar energy potential estimated at 6.8 GW"; Balkan Green Energy News. Retrieved 18 March 2022. ^Spasi?, Vladimir (10 November 2021). "Croatia to add 1.5 GW of renewables by 2025"; Balkan Green Energy News. Retrieved 18 March 2022.

Croatia's National Energy Strategy 2009-2020 has three basic objectives: increase security of energy supply, develop competitive energy system and ensure sustainable energy sector development. These objectives are particularly important for the country

To achieve its goal, Croatia set up a 2030 National Energy and Climate Plan. The national strategy aims at a 36.4% share for renewable energy by 2030 and significant investment across the energy sector, including ...

Croatia: Many of us want an overview of how much energy our country consumes, where it comes from, and

if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...
