

Current prices of solar panels

How much do solar panels cost?

But the average solar panel system of 3.5kWp will cost around £7,000 to install, according to estimates from the Energy Saving Trust. The exact cost will vary, depending on the size of your home and how much electricity you want to produce. See how much you can expect to pay. Find out: are solar panels worth it?

How much does a solar battery cost?

A battery means you can store excess energy produced by your solar system, which you can then use at night, or to sell back to the grid. Solar batteries can cost anywhere between £1,000 and £4,000, depending on the size you require. Prices correct as of October 2024. The size and complexity of an installation will dictate the labour costs.

How much does a solar system cost in the UK?

In the UK, the typical solar panel system sees a labour cost between £300 and £500 per person per day for a skilled two-person crew. While labour may account for 10-30% of your total solar system cost, these figures are not set in stone--alternative pricing options like 20 pence per watt provide flexibility.

How much does a solar system cost?

When you receive a quote for a solar system, it generally includes labour costs, but as a rough guide, the prices can range from £300-£500 per day per installer. The time taken to install a system typically depends on its size and the accessibility of the roof.

How much does it cost to clean solar panels?

However, if you notice your solar panels becoming dirty - for example, bird droppings, or dust building up on them during a dry, hot summer - you should consider getting them cleaned. Solar panel cleaning by a professional will cost around £100, but you can do it yourself with a hose. How much do solar batteries cost?
