

Customized photovoltaic glue board for home decoration

What type of adhesive is used for solar panels?

Made with double sided, industrial strength adhesive or our custom hybrid system. High tack adhesive film protects photovoltaic module glass, aluminum, and various metals from damages. Use our residue-free film tape during shipping, handling, and production line processes. PROTEK(TM) film solar tape also resists UV and outdoor aging up to 6 months.

What are photovoltaic tapes used for?

Photovoltaic tapes for the renewable energy market for bonding, venting, insulation, protection & masking. Custom rolls & die-cut shapes available.

How do you connect a solar panel to a circuit board?

The hole should be in the center of the lid and just large enough to pull the black and red wires through. Put the black and red wires through the lid, take the stripped wires from the solar panel and connect them to the circuit board.

Our designs transform the utilitarian grid of standard photovoltaic modules into large-scale, decorative patterns that can integrate with, and enhance, architecture and landscape design. If ...
