

What is the future of solar power in Cyprus?

Solar photovoltaic (PV) power has already attained prominence, with installed capacity in 2030 expected to reach between 500 megawatts (MW) and 1,000 MW, depending on the scenario. The roadmap also indicates that deployment of renewables could greatly reduce energy import dependence while lowering the cost of electricity generation in Cyprus.

Does Cyprus have solar power?

More Energy related stories Sun-drenched Cyprus imports most of its energy, but this is unnecessary: Cyprus has the highest solar power potential in the European Union. Local engineers and researchers, together with energy experts from Austria and Denmark, have worked to develop the use of this natural resource on the island.

Can Cyprus be a hub for solar energy innovation?

Local engineers and researchers, together with energy experts from Austria and Denmark, have worked to develop the use of this natural resource on the island. The research promoted the development of Cyprus as a hub for solar power innovation. The initiative harnessed expertise on all aspects of the solar energy cycle.

Where can I find solar energy in Cyprus?

The solar energy and installation companies can be found in all of the major cities throughout the island, including Nicosia (the capital), Limassol, Larnaca, Famagusta and Paphos. In 2011, the Cypriot target of solar power including both photovoltaics and concentrated solar power was a combined 7% of electricity by 2020.

How can Cyprus become more energy self-sufficient?

In an attempt to make Cyprus more energy self-sufficient, the EU-funded TwinPV initiative focuses on bolstering the country's technological know-how through the sharing of expertise on the entire solar energy cycle - from cells and modules to storage and smart electricity grids.

Which country has the highest solar potential in Europe?

"Cyprus possesses the highest solar potential in Europe but the country currently imports almost all of its power, making it an ideal location for the development of solar energy," says TwinPV coordinator George E. Georgiou of the University of Cyprus.

Basking in more than 3300 hours of sunlight per year, Cyprus has the highest solar power potential in the European Union but currently imports most of its energy. An EU-funded project is helping the Mediterranean country better ...
