FranklinWH guarantees that the FranklinWH aPower will have the rated energy capacity of 13.6 kWh when this limited warranty begins, and the capacity retention will be not less than 70% of the rated capacity when 1) the 12-year warranty period expires, or 2) the aggregate energy throughput reached 43MWh, whichever comes first.

A home energy storage system stores heat or electricity locally when it is readily available for later consumption. The most common types of energy storage systems are electric batteries, heat batteries, and thermal storage systems. Home energy storage systems store generated electricity or heat so that it can be used when needed at a later time.
