

DR Congo complete solar kit with battery

How much power does DRC need?

Even with new solar and wind DRC could only satisfy between 15 and 55% of total demand. This leaves between 45% and 85% needing offgrid power or 16 gWof installed solar capacity ! Same applies to clean water as only 23% have access.

How many Solar Ambassadors are there in the DRC?

We have 3,500+Solar Ambassadors in our network,working across 22+provinces. Between them,they distribute 10,000+products every month. 90% of Congolese people lack access to electricity. We want to see energy poverty eliminated in the DRC by 2030. Our cost effective systems help off-grid customers power a wide range of appliances.

How much solar power is available in Kinshasa?

In the area around Kinshasa there is a further 6 gWof solar available at 7 us cents per kW hr. There is also sufficient for the rural areas around Kinshasa,Mbandaka on the Congo river and the main port of Matadi. It can even be exported over the river to Brazzaville.

What was the main transport artery in the Congo?

When Europeans entered the Congo in the mid 19 th Century the Congo riverwas the main transport artery. During the Belgian colonial rule they operated a series of ferries that worked like a train service from Kisangani all the way to Kinshasa calling at each river port. Direct ferries are now long gone as there are major problems with navigation.
