

The Sunflake Solar Array designs can easily be adapted for deployable arrays in microgravity and could be used on any mission that requires lightweight portable high-efficiency energy, including use on any form of human lander, future lunar outpost, or orbital station.

EnduroSat's 6U Deployable Solar Array is capable of generating up to 19.2 W in LEO. Triple Junction Solar Cells for Space Applications with efficiency higher than 29.5%. The solar panel supports multiple integrated sun sensors and ...

The deployable static solar array HDRS has been successfully used on several missions, first launched upon the DMC-CFESAT spacecraft in 2007 for a U.S. customer (Figure 1), and later used on DMC -UK2 and EXACTVIEW-1 launched in 2009 and 2012, respectively.

The payload, a deployable solar array with an integrated antenna called the Lightweight Integrated Solar Array and anTenna, or LISA-T, has initiated deployment of its central boom structure. The boom supports four ...

The payload, a deployable solar array with an integrated antenna called the Lightweight Integrated Solar Array and anTenna, or LISA-T, has initiated deployment of its central boom structure. The boom supports four solar power and communication arrays, also called petals. Releasing the central boom pushes the still-stowed petals nearly three ...

The EXA DMSA/1 (Deployable Multifunction Solar Array for 1U) is the upgraded version of the venerable DSA 1/A, it is our entry level product of a family of deployable solar arrays based on artificial muscles for cubesats in the range of 1U to 6U.

The engineering team of the Ecuadorian Civilian Space Agency began studying the design and development of a very thin, deployable, multipanel solar arrays, able to fold in no more than 6 millimeters height as our spacecraft was an 1U ...

Deployable 100W Origami solar array for high-power space missions, stowed within a 1U form factor. The DCUBED PowerCube is a deployable 100W Origami Solar Array stowed within a 1U form factor. PowerCube enables extreme power-intensive space missions while requiring only minimal stowed volume during launch. It is one of the smallest, yet ...

Rigid-Deployable Solar Array Dcubed's solar arrays are built using a modular approach, which makes them extremely compact, light-weight and durable. This allows you to maximize power generation for a given mass and volume, or provides you with a ...

Deployable solar array Argentina

The EXA DMSA: Deployable Multifunction Solar Array with embedded antennas, magnetorquers and sensors is the upgraded version of the latest DSA 1/A, it is our entry-level product of a family of deployable solar arrays based on artificial ...

DSS awarded contract by Ball Aerospace to provide the solar array for NASA's IXPE Program. Santa Barbara, California, March 12, 2019 - Deployable Space Systems, Inc. (DSS), a leading supplier of innovative flexible blanket and rigid panel solar array systems, and deployable structures, announced today that it has been awarded a contract by Ball ...

DMSA: Deployable Multifunction Solar Array with embedded antennas, magnetorquers and sensors . SUMMARY . The EXA DMSA/1 (Deployable Multifunction Solar Array for 1U) is the upgraded version of the latest DSA 1/A, it is our entry level product of a family of deployable solar arrays based on artificial muscles for

The Transformational Solar Array uses Deployable Space System's (DSS) Roll Out Solar Array (ROSA) as a structure and equips the array with very high efficiency SolAero Inverted Metamorphic (IMM) solar cells and reflective concentrators. Figure 1 is a photograph of a ROSA array without concentrators. Figure 2 is a photograph of a concentrator ...

This deployable solar array subsystem consists of two (2) deployable solar array panels and one (1) center mount panel. Each deployable panel rotates 180 degrees at hinges mounted on the 2U edge of the spacecraft. The panels are populated with (2) strings of 7 cells. Hinge mechanisms are torsion-spring activated and contain dual-sliding ...

EnduroSat's 3U Deployable Solar Array, is a flight proven solar panel and is capable of generating up to 8.4 W per side in LEO. Triple Junction Solar Cells for Space Applications with efficiency higher than 29.5%. The solar panel supports multiple integrated sun sensors and gyroscope, optional magnetorquer. Configurations: - Panel without MTQ ...

The 135W Deployable Articulated Solar Array (DASA) is a compact, deployable 135W solar array with two single-motor SADAs driving independently steerable 67W triple-panel solar arrays. It is compatible with the Pumpkin SUPERNOVA ...
