How does Envie use disassembly equipment to dismantle PV panels?

"Envie will utilize our disassembly equipment to dismantle PV panels and then cooperate with Rosi, a French company that developed recycling processes allowing to separate and recover metals such as silver and high purity silicon from the PV cells," it further explained.

How have solar panels changed over the years?

However, despite the massive advancements in technology, basic solar panel construction hasn't changed much over the years. Most solar panels are still made using a series of silicon crystalline cells sandwiched between a front glass plate and a rear polymer plastic back-sheet supported within an aluminium frame.

Can I use defective details for my solar battery?

It was included 10 plates and a soldering pencil. It's OK to use defective details for our solar battery - this just makes it cheaper. So, don't worry to take them for your home-made battery.
