

# District photovoltaic panel installation recruitment information

How many jobs does a solar photovoltaic installer have?

Depending on the job and state laws, PV installers may connect the solar panels to the electrical grid, although electricians sometimes do this task. Solar photovoltaic installers held about 17,100 jobs in 2021. The largest employers of solar photovoltaic installers were as follows:

How much do solar photovoltaic installers make a year?

The median annual wage for solar photovoltaic installers was \$48,800 in May 2023. Employment of solar photovoltaic installers is projected to grow 48 percent from 2023 to 2033, much faster than the average for all occupations. About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade.

What does a solar PV installer do?

The Solar PV Installer will assemble, install, or maintain solar photovoltaic (PV) systems on residential roofs, at times commercial facilities, in compliance with site assessment and engineering schematics. May include measuring, cutting, assembling, and bolting structural framing and solar modules.

How do I become a solar photovoltaic installer?

There are multiple paths to becoming a solar photovoltaic (PV) installer, or PV installer. These workers typically need a high school diploma, but some take courses at a technical school or community college; they also receive on-the-job training lasting up to 1 year. Some PV installers learn to install panels as part of an apprenticeship.

What does a photovoltaic installer do?

May perform minor electrical work to validate installation process. **DUTIES AND RESPONSIBILITIES:** Load and unload job components for daily projects. Install photovoltaic (PV) systems in accordance with codes and standards, using drawings, schematics, and instructions.

How many solar workers will Biden-Harris have in 2035?

According to the Solar Futures Study, in order to achieve the Biden-Harris administration's goal of an inclusive, equitable transition to a fully decarbonized electricity system by 2035, the solar workforce will need to grow from approximately 250,000 workers in 2021 to between 500,000 and 1,500,000 workers by 2035.
