What is a standby generator & a battery backup system?

Operation: These setups combine a standby generator with a battery backup system. The generator can provide comprehensive, long-term power continuity for the entire house and function like a whole-house UPS. The battery serves as a buffer to ensure uninterrupted power during the transition between grid power loss and generator activation.

Are portable generators better than battery backups?

With that said, portable generators can be a good option in some cases. Unlike battery backups, you only need a single generator to restore power in an outage, which brings down the upfront costs. Plus, standby generators can last longer than battery backup systems in a single session.

How do I choose a reliable backup power solution?

If you deal with such situations regularly, it's time to consider getting a reliable backup power solution. There are two main options that can help provide a steady power supply; home batteries and generators. We break down how to choose between these from various perspectives, including budget, longevity and convenience.

What is a home battery backup system?

Home battery backup systems, like the Tesla Powerwall or the LGES 10H and 16H Prime, store energy, which you can use to power your house during an outage. Batteries get that electricity from your home solar system or the electrical grid. As a result, they're much better for the environment than fuel-powered generators.

Can you use a battery backup to power your home?

Instead of paying high electricity rates during peak usage hours, you can use energy from your battery backup to power your home. In off-peak hours, you can use your electricity as normal -- but at a cheaper rate -- and recharge your battery when it costs less.

How does a whole-home battery backup system work?

Operation: Standard whole-home battery backup systems offer comprehensive, long-term power continuity, functioning like whole-house UPS. They are capable of providing electricity to your entire home for an extended duration during outages like a whole house UPS.

The phrases "battery generator" and "solar generator" are pure marketing -- effective marketing, but still out of touch with reality. I just need enough power to keep my fridge and freezer running as I have a lot of frozen meat stored. I would start by making sure your freezer is full -- if there is empty space, fill it with bottles of water.
