

# Dominica's new energy systems

What is the Dominican energy project?

This project is designed to support the Commonwealth of Dominica in developing and integrating clean, sustainable and low-cost energy. Through this \$38.5 million project, a new robust transmission network will be built to withstand natural hazards, strengthening Dominica's electricity grid.

Does Dominica have a national energy plan?

Dominica drafted a national energy plan in 2011 and revised it in 2014. The objective of the plan is to make electricity generation on the island self-sufficient by 2020 using sustainable and indigenous resources.

Does Dominica rely on diesel?

Currently, Dominica relies heavily on diesel for about 70 per cent of its electricity. However, DOMLEC is actively engaged in renewable energy projects to reduce carbon emissions and decrease dependence on foreign oil. DOMLEC's most significant renewable energy endeavour is the construction of a geothermal power plant in the Roseau Valley.

How is Dominica transforming geothermal energy?

"Dominica is making significant strides in geothermal energy, with innovative investments to deliver clean, low-cost electricity to its citizens and thereafter, the Eastern Caribbean. With support from the World Bank and the Government of Canada, we are building a resilient network for geothermal energy transmission.

Will Dominica reduce its reliance on fossil fuels?

Roseau, Sept. 25, 2023 (GLOBE NEWSWIRE) -- The Commonwealth of Dominica, a Caribbean Island nation, has been taking substantial steps to revolutionise its energy sector and diminish its reliance on imported fossil fuels.

Why is Dominica struggling with electricity?

Dominica's electricity sector is currently challenged by outdated infrastructure, largely dependent on aging diesel generators which result in high electricity expenses and an unreliable power supply, hampering the country's competitiveness.

AES Dominicana, a unit of AES Corporation (NYSE:AES), announced on Tuesday that it had put into operation 20 MW of new energy storage battery systems in the Dominican Republic. Located on sites in the Santo Domingo region, each of the two systems supplied by AES Energy Storage has a capacity of 10 MW. They are the first of their kind in ...
