

What type of energy does the Dominican Republic use?

This page is part of Global Energy Monitor 's Latin America Energy Portal. Fossil fuels- including oil,natural gas,and coal - supply most of the Dominican Republic's energy,supplemented by smaller amounts of renewables,including hydro,wind,solar and biofuels.

Which sector consumes the most energy in the Dominican Republic?

Transport: this sector consumes the most energy in the Dominican Republic yet national energy plans do not consider renewables deployment for the sector. Liquid biofuels could replace gasoline and diesel but no market exists. Demand needs to be created by setting targets.

What is the Dominican Republic's Energy Roadmap?

This roadmap was developed in close co-operation with the National Energy Commission (Comisi#243;n Nacional de Energ#237;a or CNE). It quantifies what can realistically be achieved by 2030 in the Dominican Republic's total energy system in terms of renewable energy technology potential, cost and savings.

How much electricity will the Dominican Republic generate by 2030?

Data provided by CNE and IRENA estimates show that the Dominican Republic could generate 16 TWhof electricity from renewables by 2030. This would be produced from a renewable power generation capacity of 6 GW (from a total installed capacity of 10 GW,including non-renewable technologies).

Does the Dominican Republic rely on fossil fuels?

The country relies heavily on fossil fuel imports,which account for nearly all of its primary energy supply at present. The Dominican Republic has set ambitious targets to reduce its per capita greenhouse gas (GHG) emissions.

Is the Dominican Republic a good country to live in?

The Dominican Republic is one of the largest and most diverse economies in the Caribbean region, and its energy consumption is growing rapidly. The country relies heavily on fossil fuel imports, which account for nearly all of its primary energy supply at present.

the Dominican Republic, a regulatory roadmap for energy storage is currently being developed. To further promote energy efficiency, Energy Efficiency Decree 158-23 on Energy Savings and Efficiency was issued for all public institutions. A Bill on Energy Savings and Efficiency has been submitted to the Congress of the Republic.
