Just about to start toying around with Draconic Evolution Energy Relays. Quite a few questions out there, many with specific answers. But I am not managing to completely get the picture of how things work. So... What I understand so far: This all works much like Immersive Engineering with the wire connection stuff.

I am playing Skyfactory 3 with my friend for some time now, we build a tier 8 energy core from Draconic Evolution and have a max size reactor to power it, the problem is that the flux point connected to it won't transfer RF if it's at 2.147b RF (32 bit integer limit), it DOES work with any other form of energy transfer.

I am curious if anybody has a decent setup to automate Draconic Evolution Fusion Crafting with the latest Refined Storage. The approach I had found online which worked well used Blocking in the patterns from RS. But that feature has been removed. So.. I am struggling to figure out how to make it possibly work.

TL;DR: Don't expect a Draconic Reactor to get you the Chaos Shards you need for the pack; while it does produce them as waste, it's insanely slow (a week or 2 per run) and a full run gets you up to 8 Large Chaos Fragments, or 8/9 of one Chaos Shard... and you need hundreds of Chaos Shards. Its power output is also easily outdone by other, much safer and more scalable ...

The energy core provides unlimited power storage at max tier. The chest plate provides creative flight and uses power to prevent damage. The Chaotic Staff of Power also gets pretty big damage, I think mine is at 1400 attack power right now.
