What is Drax Power Station?

Since Drax Power Station first began generating power in 1974, it has become a cornerstone of the UK's energy infrastructure, now producing 9% of the nation's renewable electricity - the largest single source of renewable power in the country.

Does Drax have a multi-year supply deal with pathway energy?

British power company Drax said on Thursday it had reached an agreement on the terms of a multi-year supply deal of biomass pellets for Pathway Energy's proposed sustainable aviation fuel project in the United States.

Why did Drax push back the start of new gas-fired power stations?

In November 2024, Drax Group Plc pushed back the start of three new gas-fired power stations in South Wales, Suffolk, and Bedfordshire to next year because of delays in getting the units connected to the grid. Drax had previously stated that the facilities would start in Autumn 2024. Drax Group's key asset is Drax Power Station.
