

ENERGY SYSTEMS. Endurance Power System; Performer Power System; Energy System Components; Client Portal; CAREERS. Positions; Life @ Edge; Benefits; UNCREWED SYSTEMS. VXE30 Stalker; VXE30 Stalker Havoc Configuration; ... "I work at Edge Autonomy as a Corporate Publication Writer/ Pilot Instructor, and I absolutely love being a part of the ...

Hence, most sUAS have moved towards all-electric propulsion systems and utilize high-energy batteries as their energy source. But an sUAS that relies only on batteries (including even the most advanced battery technologies) has significant limitations compared to an sUAS with a traditional propulsion solution, most notably a major reduction in ...

Life @ Edge; Benefits; UNCREWED SYSTEMS. VXE30 Stalker; VXE30 Stalker Havoc Configuration; Penguin C VTOL; Penguin C MK2; Penguin B Configurable Airframe; Compare uncrewed aircraft systems; PAYLOADS. E95; E140LC; ... Category: Power and Energy Systems ...

By equipping aircraft with a small, lightweight, and proven fuel filtration system, Edge Autonomy ensures that soldiers in the field have the autonomy to refuel the Stalker with any available propane, whether from a petrol station, a convenience store, or a kitchen in a nearby village. With no need to source specialized propane, mission ...

Our Energy Systems provide reliable off-grid power to critical equipment that rangers and border patrol agents rely on to stay safe and connected. ... Edge Autonomy Acquires Adaptive Energy, a Leader in Solid Oxide Fuel Cell Technology August 8, 2022 Epsilon 140 demonstrates small object Moving Target Indicator

A stabilized picture is crucial to providing accurate data. Our systems come pre-installed with software stabilization and roll correction, ensuring high-definition imagery that is normally reserved for much larger, more expensive gimbals ...

With a modular open systems architecture platform, our VXE30 Stalker SUAS is ready for integration, providing flexibility in mission kit out. A crew of two can easily operate this aircraft and all the necessary equipment, from transportation to assembly to launch, ground station monitoring, landing, and pack-up.

Edge Autonomy Energy Systems (formerly known as Adaptive Energy) is a provider of backup and portable power solutions. It delivers battery tenders that integrate with wind, solar, and other alternative technologies as well as the Endurance Series products for use in pipeline monitoring and data collection. The company also offers enclosures ...

Edge Autonomy, a leading provider of uncrewed autonomous systems, announced today a major performance enhancement to the field-proven VXE30 Stalker UAS. Through a series of subsystem upgrades - known collectively as the "Havoc" configuration - Edge Autonomy has doubled the flight endurance and payload capacity of the base VXE30 ...

Uncrewed aircraft systems from Edge Autonomy can be deployed quickly and easily, providing rapid response for time-critical operations. VXE30 Stalker This small, uncrewed aircraft system (SUAS) features quick and easy assembly and silent operations for effective long-range reconnaissance (LRR).

Robust surveillance and reconnaissance capabilities in a small form factor E140Z G2 A stabilized camera system in a small but robust form factor WIDE SURVEILLANCE VARIATION The E140Z G2 is a solution for numerous types of missions where superior image stabilization, leading LWIR performance and long-range imaging is required in a small payload capacity. KEY [...]

About Edge Autonomy Edge Autonomy is a leader in providing innovative autonomous systems, advanced optics, and resilient energy solutions to the U.S. Department of Defense, the U.S. Federal Civilian Agencies, allied governments, academic institutions, and commercial entities. Edge Autonomy draws on a 34+ year history of ...

About Edge Autonomy Edge Autonomy is a leader in providing innovative autonomous systems, advanced optics, and resilient energy solutions to the U.S. Department of Defense, the U.S. Federal ...

Edge Autonomy is committed to robust innovations that allow teams to share data and communicate more effectively, thereby improving the outcome of ISR missions in a variety of environments. Interested in the advanced optical gimbal cameras in Edge Autonomy's Octopus line of ISR systems? Learn more about our cutting-edge solutions here.

Edge Autonomy is a leader in providing innovative autonomous systems, advanced optics, and resilient energy solutions to the US Department of Defense, US Federal Civilian Agencies, allied governments, academic institutions, and commercial entities.Edge Autonomy draws on a 34+ year history of aerospace engineering, advanced manufacturing ...

To be a recognized leader across uncrewed aircraft systems, power solutions, and intelligence, surveillance, and reconnaissance solutions through leading-edge technologies, enabling mission success for our customers on land, in the air, and at sea.
