

Edify energy Barbados

Who is Edify Energy?

John founded Edify Energy in 2015. John brings 10 years of experience in the European and UK renewable energy development and investment sector to the Australian market.

What makes edify unique?

Through our unique business model and approach, we deliver world-class energy assets that not only have a positive impact on the environment but also create sustainable value. Edify recognises the Traditional Owners and their descendants as the traditional custodians of the lands on which Edify strives for a clean energy future.

How has edify changed Australian energy industry?

Punching above our weight, we've delivered in excess of \$2 billion of investment to create new Australian energy infrastructure. In a short space of time, Edify has reshaped the domestic renewables sector and disrupted outdated industry models. We've built relationships and financed projects in unique and innovative ways.

Will edify's Solar-Storage Project benefit the National Electricity Market?

In its application for approval under the federal government's EPBC Act, Sydney-based Edify said the location of the solar-storage project will allow for efficient integration with the National Electricity Market (NEM), without the need for additional extensive infrastructure.

Why should Barbados invest in the energy sector?

The energy sector in Barbados should be invested in to foster development, promote energy security, reliability, affordability, and establish and maintain a sustainable sector. This can be achieved through innovation and workable partnerships which promote a strong economy and a healthy environment.
