

Egypt alencon systems

Alencon Systems LLC is proud to announce its award of U.S. patent #11,146,079 which addresses the novelty of the company's Bi-Directional Optimizer for Storage Systems (BOSS) DC:DC converter. This patent award is Alencon's seventh granted U.S. patent. The patent specifically addresses the unique technological and applications aspects of ...

Alencon's Bi-Directional Optimizer for Storage Systems - the BOSS - is a unique, galvanically isolated, bi-directional DC-DC converter for stationary storage applications Products SPOT - PV String DC-DC Optimizer

Alencon's Grid Inverter Package - the GrIP - is a 10MW central PV inverter, the largest available on the market today. The GrIP uses Alencon's Patented Harmonic Neutralization technology to shatter the barriers of price, reliability, efficiency and size of traditional PWM-based PV inverters.. With a rugged, sealed enclosure, liquid-cooled components, heavy duty copper buses, and no ...

Alencon's isolated DC:DC converters are particularly helpful in this regard because they use a specialist, high-frequency silicon carbide transistors and transformers to map the nominal voltage of the fuel cell into the nominal voltage of the DC bus to which it is connected. Once the DC:DC converter brings those two different voltage levels ...

Alencon develops innovative DC/DC converters for renewable energy power systems. Alencon's team members work in a creative and fast-paced environment, producing some of the most innovative power conversion ...

Learn About the Benefits of a PV-Centric Approach to DC-Coupled Solar + Storage. Solar + Storage is hot. Really hot. Like the market is going to double six times in the next 15 years hot, according to Bloomberg New Energy Finance.

In 2011, DOE awarded startup Alencon Systems \$3 million to develop a utility-scale inverter system for solar PV plants. Since then, the company has manufactured its innovative product and is helping grow the ...

Alencon Systems' SPOTs, powerful DC-DC optimizers for utility-scale PV applications, played a valuable role in the AGU's renovation project. The SPOTs work as PV string and array level DC-DC optimizers for repowering ...

The GARD can be deployed as a standalone device or in conjunction with Alencon's String Power Optimizer and Transmitter - the SPOT. Additionally, the GARD can be used with or without remote communications. The GARD can be installed ...

Easier Management of System Grounding - Galvanic Isolation can be a great tool in a number of alternative energy application for resolving differentials in grounding schemes between input and output. Two great examples of this benefit are explained in the articles below:

At Alencon Systems, we are passionate about power. We were founded by world leading power electronics experts who wanted to apply their unique level of knowledge and experience to help alternative energy become even more cost competitive with other forms of generation. The SPOT is one of the largest ETL listed DC-DC optimizer for PV applications available on the market ...

Here at Alencon, we are seeing the movement toward DC microgrids unfolding before our eyes everyday. Our DC-DC optimizer, the SPOT, provides the point of entry of PV into a DC microgrid by taking the variable voltage harvested from PV and providing a fixed voltage to a DC bus or other DC devices at their preferred voltage.

Alencon has partnered with IMO to offer the Fire Raptor the ultimate solar panel rapid shutdown solution - developed and designed with Fire Safety prominently in mind and compliant with stringent standards of NEC 2017. The Fire Raptor can be installed with either new PV systems or as a retrofit to existing systems to bring them into compliance with NEC 2017 and other local ...

The GARD can be deployed as a standalone device or in conjunction with Alencon's String Power Optimizer and Transmitter - the SPOT. Additionally, the GARD can be used with or without remote communications. The GARD can ...

This portal is your one stop, secure location for accessing Alencon technical documentation such as product manuals, modbus maps and applications notes. Additionally, this portal is tailored to your company and includes project specific data such as config and metadata files for your purchased Alencon devices.

At Alencon Systems, we are passionate about power. We were founded by world leading power electronics experts who wanted to apply their unique level of knowledge and experience to help alternative energy become even more cost competitive with other forms of generation.
