

Enera energy Portugal

What is energy industry Portugal 2024?

From solar and wind energy to energy storage and regulatory innovation, the agenda of ENERGYEAR PORTUGAL 2024 will address the latest technological advancements, market trends, and energy policies that are transforming the landscape of renewable energies in Portugal and beyond.

What percentage of energy is renewable in Portugal?

In 2013, 25.7% of the energy in Portugal was renewable, increasing to 27% in 2014 and 28% in 2016. By 2020, this number increased to around 30%. Portugal made worldwide news when in February 2016, 95% of the electricity produced in Portugal was sourced from renewable energy, including biomass, hydropower, wind power, and solar power.

Is there nuclear energy production in Portugal?

There is no nuclear energy production in Portugal. While Portugal has one research reactor, it has been without nuclear fuel since early 2019 and will be decommissioned. No nuclear energy activities are planned in the future in Portugal, according to the European Nuclear Safety Regulators Group.

Will offshore wind power reduce Portugal's energy dependence?

The Portuguese Minister of Environment and Climate Action Duarte Cordeiro claimed that developing hydrogen and offshore wind power will allow the country to reduce its energy dependence.

How many GWh of electricity is produced in Portugal?

Between January 1st and May 31st of 2023, 18,751 GWh of electricity were generated from Continental Portugal, from which 73.2% came from natural resources (sources (30.5% wind, 28.30% hydro, 7.6% bioenergy and 6.8% solar). Other sources include: Natural Gas (15.9%), Fossil CHP (4.7%), and Pumped Storage (6.2%).

Why is wind energy important in Portugal?

Wind energy remains a crucial component of Portugal's electricity production, accounting for 25% of the total. Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way.
