Why do small islands need a new energy infrastructure?

Islands - including those that make up the group known as Small Island Developing States (SIDS) - also need to upgrade their energy infrastructure so that it is resilient to higher temperatures, more frequent natural disasters and flooding related to rising sea levels.

Why is Puerto Rico's energy grid so fragile?

The grid, which is still being rebuilt, was in a fragile state even before the storm hit due to a lack of investment and maintenance. Fossil fuels currently generate 94% of Puerto Rico's electricity, with the island tasked with obtaining 40% of its energy from renewable sources by next year and 60% by 2040.
