It is expected to attract one trillion NTD (USD\$32 billion) investment business opportunity by 2025, making its future prospects highly promising. Energy Taiwan and Net-Zero Taiwan, will be hosted at TaiNEX 1 from October 18-20, 2023. The exhibition has grown by 25%, reaching a new record high!

What percentage of Taiwan's electricity comes from fossil fuels?

In 2022, 79.6% of Taiwan's electricity generation came from fossil fuels (43.4% natural gas, 34.8% coal, 1.4% oil, 1.4% cogeneration, 1.2%), 9.1% from nuclear, 8.6% from renewables, and 1.2% from hydro. Taiwan relies on imports for almost 98% of its energy, which leaves the island's energy supply vulnerable to external disruption.

What type of energy is used in Taiwan?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Taiwan: How much of the country's energy comes from nuclear power?

Does Taiwan rely on imported energy?

Meanwhile, nuclear power, which has long been a reliable and relatively low-carbon energy source for Taiwan, provides 7 percent of the nation's electricity and pumped storage accounts for 1.2 percent. Taiwan's extreme reliance on imported energy sources poses significant risks.

What is Taiwan's energy security?

Taiwan's energy security is a complex and serious issue, one that cannot be sacrificed to populist or activist sentiment. The future of Taiwan's energy mix must be determined through a rational, fact-based lens, with a clear focus on maintaining economic competitiveness and global leadership in high-tech industries.
