

Is Tajikistan part of EU4Energy?

Tajikistan is one of the focus countries of the EU4Energy programme, which is being implemented by the IEA and the European Union along with the Energy Community Secretariat and the Energy Charter Secretariat.

Is there a market for Energy Services in Tajikistan?

At the same time, the EBRD has also opened a credit line for citizens who want to implement energy-efficient technologies in their own homes (EBRD, 2017). A market for energy services and ESCOs does not currently exist in Tajikistan.

How is Tajikistan generating energy?

At the same time, the rest of Tajikistan is mainly heated through electricity, biomass and coal. Meanwhile, in Dushanbe projects are being implemented with EBRD to finance the private sector (mostly sports facilities), providing loans to establish RES and implement energy-efficient measures.

Why is energy security important in Tajikistan?

Energy security in Tajikistan is critically unstable and therefore of central concern for the government. The country relies on hydropower for nearly all its electricity needs, but seasonal generation volatility means that there is a surplus of electricity during the summer and a shortfall during the winter.

What is the IEA energy sector review of Tajikistan?

IEA. All rights reserved. This International Energy Agency (IEA) energy sector review of Tajikistan was conducted under the auspices of the EU4Energy programme, which is being implemented by the IEA and the European Union, along with the Energy Community Secretariat and the Energy Charter Secretariat.

Does Tajikistan have a good energy infrastructure?

While Tajikistan has been successful in providing universal access to electricity, the existing systems of its energy infrastructure function inefficiently. The large majority of hydro plants were built in the Soviet era and are ageing and require rehabilitation.
