

Energy group as Syria

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

How much oil does Syria produce a day?

****Prior to sanctions, Syria produced some 383,000 barrels per day (bpd) of oil and liquids, according to previous analysis by the U.S. Energy Information Administration (EIA). **Oil and liquid production fell to 40,000 bpd in 2023, according to separate estimates from the Energy Institute.**

Why did a tanker carry Iranian oil to Syria?

LONDON, Dec 9 (Reuters) - A tanker carrying Iranian oil to Syria turned round in the Red Sea to head away from its original destination after the fall of Syrian President Bashar al-Assad. Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector.

Why is energy demand increasing in Syria?

Energy demand in Syria has been increasing at a rate of roughly 7.5% per year due to the expansion of the industrial and service sectors, the spread of energy-intensive home appliances, and state policies that encouraged wasteful energy practices, such as high subsidies and low tariffs.

What happened to Suncor Energy in Syria?

****Canada's Suncor Energy Inc suspended its Syria operations in 2011. Its primary asset is the Ebla development located in the Central Syrian Gas Basin covering more than 300,000 acres (approximately 1,251 square kilometres). The gas field was producing 80 million cubic feet of natural gas per day.**

Why did Syria lose its major oil and gas fields?

The Syrian government lost its major oil and gas fields first to the Islamic State and then to the Autonomous Administration of North and East Syria. This loss contributed to extreme fuel scarcity and a reliance on imports, notably from Iran.

Union Electric Group is among the biggest establishments of its kind, originally found to meet the rising demand for energy in the local and regional markets. It's considered as a leading establishment in the electrical industry and represents ...

The Syrian Atomic Energy Commission (SAEC) was established in 1976 and began its institutional activities since 1979. SAEC is a governmental agency responsible for atomic energy affairs and its applications in peaceful areas.
