Who is Equis Energy?

Equis is the largest renewable energy IPP in the Asia-Pacific region based on installed capacity, with 180 assets comprising 11,135 MW in Australia, Japan, India, Indonesia, the Philippines, Taiwan and Thailand. Equis Energy operates from 15 Asian offices, employing over 300 professionals, including 100 engineers and 38 local development

How much money did Equis Energy make?

When renewables private equity group Equis Energy was sold to GIP for \$5 billion - \$3.7 billion of its equity - investors walked away with well over double their initial investment. The founders of Equis made around \$800 million.

Did the sale of Equis Energy make a difference?

Many had more than doubled their money. "The sale of Equis Energy [the name of the sold renewable energy portfolio] resulted in record-breaking returns and cash distributions for numerous Equis investors," says Lance Comes, partner and co-founder. For some, it was their best-ever realized portfolio performance.

What does EQUIS do?

The primary objectives of Equis' energy business is to develop infrastructure that reduces both power prices and CO₂ emissions, whilst improving energy efficiency and reliability. Equis is investing in the circular economy, focusing on three major segments, waste-to-energy, waste management and recovery infrastructure.

How much money did EQUIS renewables receive from Indian investors?

But Equis Renewables - the partners - is thought to have received at least \$50 million for the Indian part of its portfolio. If any of the initial funding of that portfolio of 13 assets had been borne by the Equis funds, shouldn't the investors have shared in that?

Did GIP buy EQUIS for \$5 billion?

Several months earlier a consortium led by Global Infrastructure Partners (GIP), with partners including the China Investment Corporation sovereign wealth fund, had agreed to buy the renewable energy asset portfolio of Equis, a Singapore-headquartered independent infrastructure asset manager, for \$5 billion.

Equis Pte. Ltd (Equis) and Global Infrastructure Partners (GIP) announced today the closing of the previously announced sale by Equis of 100% of the equity interest in Equis Energy to GIP and its co-investors, for an enterprise value of USD5.0 billion (including assumed liabilities of USD1.3bn).

Image: CEP. Energy. Infrastructure developer and investor Equis is the latest company to propose building Australia's largest-ever battery energy storage system (BESS). Singapore-headquartered Equis said last week that it plans to build Melbourne Renewable Energy Hub (MREH), a 1,200MW/2,400MWh BESS project in
