Eritrea exagrid datasheet

How does ExaGrid work?

ralleled performance for the fastest backups and restores.ExaGrid is the only vendor that allows backup applications such as Veeam and Commvault to keep their deduplication turned on and then ExaGrid fur a for increased storage eficiency.Data Backup PerformanceThe ExaGrid system performs deduplic

How many TB does ExaGrid have?

ExaGrid offers building blocks in 1,2,3,4,5,and 10TBunits. These are not 1- 10 physical TB,but rather systems designed for backing up their rated size of data AND include room for all the de-duplicated backup retention and history.

Can ExaGrid appliances be deployed in the backup application software?

and with ExaGrid there are no agents to deploy or manage.When comparing ExaGrid appliances deduplication in the backup application software,it is important to keep in mind that using deduplication in the backup application software typically requires greater resources on the backup

Does ExaGrid have a retention lock?

be redundant to have a separate store with retention lock. With the ExaGrid delayed delete approach, all that is needed is up to an additional 10% more repository storage to hold the delay for the deletes. ExaGrid allows tion of a backup data encryption attackExample Scenarios1) Data is deleted in the ExaGrid disk-cache Landing Zone via the b

How does ExaGrid protect against ransomware?

able to recover from security attacks, such as ransomware. ExaGrid's scale-out architecture includes full appliances and ensures a fixed-length backup window as data grows, eliminating ex

Does ExaGrid support multi-site topology?

ExaGrid supports the ability to have two or more sites in a multi-site topology. At each site,backup applications can write data to the ExaGrid in place of sending backup data to tape. This is called backup to disk (or D2D).

ExaGrid Systems, Inc"s EX21000E-SEC is a server, intel processors, enterprise sas drives, fips 140-2 self-encrypting sas drives, raid6 with hot spare, redundant fans, redundant power supplies, exagrid software, 19 inch rack mount chassis. in the servers, network servers category. Check part details, parametric & specs and download pdf datasheet from datasheets , a global ...

ExaGrid Systems, Inc"s EX189-GRID-SEC is a disk capacity raw 432tb useable 378tb 189 tb full backup. disks are encrypted. includes 3 10 gigabit add on cards. in the servers, network servers category. Check part details, parametric & specs updated 17-NOV-2024and download pdf datasheet from datasheets , a global

Eritrea exagrid datasheet

distributor of electronics ...

ExaGrid Systems, Inc"s EX32000E-SEC is a server, intel processors, enterprise sas drives, fips 140-2 self-encrypting sas drives, raid6 with hot spare, redundant fans, redundant power supplies, exagrid software, 19 inch rack mount chassis. in the servers, network servers category. Check part details, parametric & specs and download pdf datasheet from datasheets , a global ...

ExaGrid Systems, Inc"s EX27 is an exagrid appliance 72tb raw capacity. in the servers, network servers category. Check part details, parametric & specs updated 18-OCT-2024 and download pdf datasheet from datasheets , a global distributor of electronics components.

ExaGrid Systems, Inc"s EX27 is an exagrid appliance 72tb raw capacity. in the servers, network servers category. Check part details, parametric & specs and download pdf datasheet from datasheets , a global distributor of electronics components.

ExaGrid Systems, Inc"s EX84-SEC is an exagrid appliance with encryption 192tb raw capacity. in the servers, network servers category. Check part details, parametric & specs updated 18-OCT-2024 and download pdf datasheet from datasheets , a global distributor of electronics components.

ExaGrid Systems, Inc"s EX32000E is a server, intel processors, enterprise sas drives, fips 140-2 self-encrypting sas drives, raid6 with hot spare, redundant fans, redundant power supplies, exagrid software, 19 inch rack mount chassis. in the servers, network servers category. Check part details, parametric & specs and download pdf datasheet from ...

ExaGrid delivers better backups using the only hyper-converged secondary storage (HCSS) for backup with data deduplication purpose-built for all leading backup applications that leverages ...

ExaGrid improves the storage economics of Commvault environments by working with Commvault compression and deduplication enabled to provide up to 15:1 reduction in storage consumption - a 3X storage savings over using Commvault deduplication alone. This combination dramatically lowers the cost of onsite and offsite backup

ExaGrid Systems, Inc"s EX18-SEC is an exagrid appliance with encryption 48tb raw capacity. in the servers, network servers category. Check part details, parametric & specs updated 18-OCT-2024 and download pdf datasheet from datasheets , a global distributor of electronics components.

ExaGrid Appliances ExaGrid Appliance GRID Nodes Connections Backup Jobs ExaGrid Appliances Connect to Form a Single Scale-Out System ExaGrid appliances are comprised of processors, memory, RAID6, and a

Eritrea exagrid datasheet

hot spare drive per appliance, using enterprise-class SAS drives and ExaGrid software . See the ExaGrid Technical Specifications data sheet for

ExaGrid Systems, Inc"s EX-10GBE-OPTICAL is a 10 gigabit ethernet dual port sfp+ optical option for all exagrid models. includes two qualified sfp+ short-range modules.. in the computer networks, network interface cards category. Check part details, parametric & specs updated 17-OCT-2024and download pdf datasheet from datasheets , a global distributor ...

ExaGrid Systems, Inc"s EX63000E-SEC is a server, intel processors, enterprise sas drives, fips 140-2 self-encrypting sas drives, raid6 with hot spare, redundant fans, redundant power supplies, exagrid software, 19 inch rack mount chassis. in the servers, network servers category. Check part details, parametric & specs and download pdf datasheet from datasheets , a global ...

ExaGrid Systems, Inc"s EX7000-SEC is a server, intel processors, enterprise sas drives, fips 140-2 self-encrypting sas drives, raid6 with hot spare, redundant fans, redundant power supplies, exagrid software, 19 inch rack mount chassis. in the servers, network servers category. Check part details, parametric & specs and download pdf datasheet from datasheets , a global ...

ExaGrid Systems, Inc"s EX126-GRID is a disk capacity raw 288tb useable 252tb 126tb full backup. includes 2 10 gigabit add on cards. in the servers, network servers category. Check part details, parametric & specs updated 17-MAR-2024 and download pdf datasheet from datasheets , a global distributor of electronics components.
