The ESD LCD SURFACE RESISTIVITY METER provides everything necessary to test work surfaces using the procedure outlined in the EOS/ESD-S4.1 standard. This test kit makes testing surface resistance easy - simply place the weights attach the cables, switch to the correct voltage and press the button to read resistance directly on the meter.

To measure surface resistivity:.. Simply place the meter on the surface of the material that requires measuring. Press the green test button. The meter will then light the appropriate LED from 10 to the power of 3 to 10 to the power of 12 Ohms per square or insulative.; To measure resistance to the ground :. Simply place the meter on the surface of the material that requires measuring.
