2) Expandability - hypothetically the Ranger can hold four Atlas-Ess packs (this will be tested in the installation video when I get the batteries). That would make it a 33.6kWh system!!! I don't think I could sit on the Ranger that long (though it would be really fun to do a range test with that). You can fit two batteries per side.

For residential and grid-scale segments, it was a record quarter, with grid-scale enjoying a particularly strong period with 3,983MW of new capacity additions, marking the first time on record that quarterly installations exceeded 3GW. That equated to a 358% increase in megawatt terms from Q4 2022's 869MW.

527 CMR 1.00: Chapter 52 currently regulates lithium ESS installations over 20 KWh. However, when adopted in October 2019, it was not anticipated that ESS installed in one- and two-family dwellings would exceed 20 KWh and the provisions of Chapter 52 are more aligned with commercial-type ESS installations.

For correct installation, follow the instructions in the individual component manuals. Important: When installing a single-phase ESS in a system with a three-phase connection to the utility grid, make sure you install the ESS on phase one, L1.
