

# Estonia ad terra energy

What is ad terra group?

We are proud to announce the formation of Ad Terra Group, the umbrella organisation regrouping Ad Terra's consulting, investment and operational activities dedicated to the future of energy.

Why did ad terra transform its consultancy services?

This transformation marks a strategic move to bolster the group's consultancy services, reflecting its expertise in various energy fields. This shift aligns with Ad Terra Group's commitment to actively driving the energy transition, ensuring a focused approach towards delivering practical, pragmatic solutions in the energy sector.

What is ad terra energy?

Ad Terra Energy is the branch supervising our operational activities for we not only provide services and financing but also act to make energy transition a reality.

Is electricity produced in Estonia based on oil shale?

Electricity production in Estonia is largely dependent on fossil fuels. In 2007, more than 90% of power was generated from oil shale. The Estonian energy company Eesti Energia owns the largest oil shale -fuelled power plants in the world, Narva Power Plants.

Why did Estonia stop relying on Russian energy sources in 2022?

In response to geopolitical tensions, Estonia reduced its reliance on Russian energy sources by halting imports of Russian pipeline gas in April 2022 and banning all Russian natural gas and oil product imports, including LNG, by September 2022.

What percentage of Estonia's energy supply is renewable?

According to the International Renewable Energy Agency (IRENA), in 2020, renewable energy accounted for 32% of Estonia's Total Energy Supply (TES). The composition of this renewable energy mix was heavily dominated by bioenergy, which represented 93% of renewables.

Dans ce cadre, la valorisation des ressources &#233;nerg&#233;tiques du sous-sol constitue la cl&#233; de vo&#251;te de notre strat&#233;gie. Notre base financi&#232;re est priv&#233;e.

Estonia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Estonia, known for its ambition and innovation, has charted an audacious path towards sustainability, aiming to power its future entirely with renewable energy sources by 2030. Bolstered by impressive strides in wind and solar power, the country is poised to become a beacon of clean energy within the European Union.
